

# Rstudio Keyboard Shortcuts for Maximizing Productivity

Updated 27 Oct, 2023

*This document lists some of the power-user shortcut keys that we found to be really useful.*

*You may also customize any keyboard shortcuts by selecting from the options bar: Tools > Modify Keyboard Shortcuts > Apply*

Windows  GNU/Linux 	Mac 	Description 
 +  + 	 +  + 	<b>Auto-reformat</b> selected code chunk.
 +  + 	 +  + 	<b>Comment or Uncomment</b> selected line(s).
 +  + 	 +  + 	<b>Duplicates</b> selected text(s).
 + 	 + 	<b>Delete</b> selected line(s)
 +  + 	 +  + 	<b>Auto-convert selected code chunk into a function.</b> Required inputs will be auto-generated. (You may input your desired function name)
 +  +  + 	 +  +  + 	<b>Replace variable name in-scope</b> (= within code chunk, not across entire document)
 +  or  or 	 +  or  or 	<b>Toggle between Source editor (1), Console (2), Help (3) tabs</b>
 +  + 	 +  + 	Insert <b>Pipe operator</b>  >
 + 	 + 	Insert <b>Assignment Operator</b> <-
